Non-Dairy Toppings (Bases and Ready-to-Whip)
Non-Dairy toppings were originally developed as alternatives to 100% dairy (whipping) cream. They are more stable, more economical, with different nutritional characteristics, than dairy. Toppings feature an aerated finish and texture like whipped cream. They can be used alone or in conjunction with real dairy. They also readily accept other ingredients (such as flavors, fruits, nuts, puddings, fillings, milk, creams, fruit juices, sugar, chocolate, cream cheese, etc.) making them ideal as toppings, fillings, basic ingredients and garnishes. Three types of non-dairy toppings are available: concentrated bases (liquid added by the end-user), ready-to-whip toppings (convenient and easy to use—just thaw and whip), and topping-in-a-bag (a ready-to-use topping, the ultimate in convenience—just thaw and decorate!).

Non-Dairy Icings
Non-Dairy icings/fillings were originally developed as alternatives to traditional “buttercream” icings. They provide a “lighter” taste than most buttercream icings, are much easier to use in decorating techniques and provide greater coverage with less weight to help reduce/minimize your overall costs. Icings provide a smoother finish and texture than toppings and most buttercream icings. Icings/fillings also readily accept other ingredients (such as flavors, fruits, nuts, puddings, fillings, milk, creams, fruit juices, sugar, chocolate, cream cheese, etc.) making them ideal as toppings/icings, fillings, basic ingredients and garnishes. Two types of non-dairy icings/fillings are available: ready-to-whip icings (convenient and easy to use—just thaw and whip), and pre-whip icing (just thaw and use).
